

Interstate Medical Licensure Compact

October 20, 2017

For Immediate Release

The Executive Director has released the preliminary data regarding applications processed by the Interstate Medical Licensure Compact Commission (IMLCC) and licenses issued via the ILMCC process. The information represents the work completed through September 30, 2017.

The information shows the value of providing an expedited multi-state licensing platform that strongly supports the work and oversight of the individual state medical and osteopathic boards. The IMLCC volume has increased at a rapid and steady pace since the issuance of the first license in April 2017.

Date	Applications Processed	Licenses Issued
April to July 2017	157	140
August 2017	49	78
September 2017	91	146
Renewals (April to Sept.)	0	20
TOTAL	297	384
